

SERVICE DOCUMENT MASTER INDEX**INDEX****FOR GENERAL
DISTRIBUTION****SUBJECT:** Active Service Documents Master Indexes**I. INTRODUCTION**

This Service Document Master Index organizes an alphanumeric list of active and recently retired service documents. Service documents not included in this index (with release dates issued earlier than this index) are considered obsolete or inactive. Inactive service documents are no longer eligible for publication or release.

This document is comprised of multiple reorganized indexes (see Table 1) tailored for your specific point of reference:

Table 1. Service Documents, Indexed by Reference¹

Section	Index Reference	Description	Page
III	FAA AD	Sorted numerically by FAA AD number and their corresponding service document (if applicable). May contain supplemental or standard practices.	2
IV	RR Document No.	Table reference to Rolls Royce Service Documents effective for Rolls Royce manufactured C90, O200, O240, and O300 engines.	4
V	Recent Changes	A summary of all documents released since the last published Index. New, revised, and retired service documents sorted by most recently released date.	5
VI	Subject Tables	Engine subsystem tables (grouped alphabetically by subject type). Active service documents are sorted by most recently released date.	9
VII	Engine Model	Cross-referenced index (grouped by engine model) with the applicable service document number and release date. Active service documents are sorted by most recently released date.	21

¹ Change Bars indicate most recent updates.

Continental issues service documents to announce product improvements and to address conditions that affect maintenance, preventive maintenance, safety and continued airworthiness. Compliance is required as specified in the **COMPLIANCE** section of each service document.

For the different service document categories released by Continental, refer to the most current version of M-0, “Standard Practice Maintenance Manual” for Continental Aerospace Technologies service documents and SIL640, “New Service Document Format” for Continental Ignition System service documents.

Information contained in service documents will be incorporated into engine parts, maintenance, and overhaul manuals at the next revision or reprinting of the affected manual. Once incorporated into all applicable manuals, the information becomes a part of the engines type design data and is required for continued airworthiness of the engine or components.

II. INSTRUCTIONS FOR CONTINUED AIRWORTHINESS

In accordance with Title 14 of the Code of Federal Regulations (14 CFR) part 33.4, Continental issues Instructions for Continued Airworthiness (ICA) for the engines and components for which it holds the Type Certificate or Parts Manufacturing Authorization (PMA) authority. ICAs are primarily published in the form of Maintenance Manuals, Overhaul Manuals, or combined Maintenance and Overhaul Manuals. These manuals may be supplemented by service documents, which may contain updates to an ICA until such time that the updated ICA is incorporated into the appropriate manual. Additionally, service documents may address a specific issue and modify the published ICA for a limited purpose which may not be incorporated into the manual (reference the latest revision of **M-0** for more information).

III. FAAAD

The following is a list of FAA Airworthiness Directives (AD) applicable to Continental engines or corresponding service documents. Document No. column may contain release announcements, follow-on maintenance, supplemental or standard practices.

¹Corresponding Continental Service Documents retired, removed from set, or superseded (SS to current version M-0 for general references, standard practices, torque tables, and maintenance practices). Documents available upon request. Please contact Continental Technical Service.

²No applicable Continental Service Documents are referenced within the specified FAA AD.

³Service Document is a coversheet or reference used for follow-on airworthiness.

⁴Added FAA AD 2016-21-04 1st Qtr., 2017

IV. ROLLS ROYCE SERVICE DOCUMENTS, *for reference only*

The following Rolls Royce Service Documents are effective on Rolls Royce manufactured C90, O200, O240, and O300 engines.

Table 2. General Topics

Rolls Royce Document No.	Subject	Mandatory	Non-mandatory	C90	O200	O240	O300
T-200	Oil Pump Gears	X		X	X		X
T244/1	Valve Guide	X			X		X
T272/2	Cylinder. P/N A50222RR		X	X	X		X
T282	Tech. Pubs		X		X		X
T304	Replacement Piston		X			X	
T398	Engine Installation	X				X	
T406	AC Fuel Pump		X	X	X	X	X
T416	Crankshaft	X				X	

V. SERVICE DOCUMENTS, listed by most recent changes¹

Table	Subject Title	Page
3	New or Revised Service Documents (01 Jan 2022 thru 15 July 2024).....	5
4	Retired & Superseded Service Documents (01 Jan 2022 thru 15 July 2024). .	5
5	Archived & Superseded Service Documents	6

NOTE: The following tables list the current period's Service Document activity during 01 Jan 2022 thru 15 July 2024. Each table includes the service Document Number, Release Date, release Status (either **N** = New, **R** = Revised, **X** = Retired, or **S** = Superseded) and Document Title/Description. All Service Documents in this section are sorted by the "Release Date" column.

Table 3. New or Revised Service Documents (01 Jan 2022 thru 15 July 2024)

NOTE: The following subject tables contain the Service Document Number, Release Date, release Status (**N** = New, or **R** = Revised document activity during 01 Jan 2022 thru 15 July 2024), and Document Title/Description. All services documents in each subject table are sorted by most recently released date.

NOTE: Special Service Instructions (SSI) are issued to address an issue on specific model and/or serial number engines. Continental will distribute SSI notification directly to the owners of the affected engines. SSIs will not be included in the general service document set but will be made available through Continental Customer Service to owners of the affected engines only. For further information on SSIs, refer to the latest revision of M-0 or contact Continental Customer Service at (251) 436-8299.

1. Change Bars indicate most recent updates.

NOTE: The following Index tables list the active Service Documents by engine model. The tables reflect the updates (New, Revised, Retired, and Superseded documents) from 01 Jan 2022 thru 15 July 2024 for each engine model. All services documents in each table are sorted by most recently released date.

1. Change Bars indicate most recent updates.
