

JOIN OUR TEAM as

Technical Factory Trainer (m/f/d)

Your Mission

The Technical Factory Trainer (m/f/d) will be responsible for developing and delivering comprehensive training programs on our diesel piston engines. This role will support aircraft owners, pilots, operators, and maintenance personnel by providing in-depth technical instruction and hands-on training. Additionally, the role will contribute to product support efforts, assisting with troubleshooting, customer inquiries, and technical documentation.

****This position can be remote, if not in the Germany, Saxony area. ****

Essential Duties and Responsibilities:

- Providing product knowledge in accordance with current standards and internal regulations
- Develop and conduct technical training courses (in-person and virtual) for customers and internal staff with focus on specialist and methodological expertise on the product
- Create and maintain training materials, manuals, and multimedia content.
- Explain the tasks to be performed to the trainees according to the training plan and progress, monitor learning progress and check results
- Maintain up-to-date knowledge of EASA / FAA regulations, engine technologies, and industry best practices.
- Represent the company at industry events, trade shows, and customer visits.
- Provide technical representation at trade shows and special events, including development and delivery of technical presentations to an audience.
- Support marketing initiatives and the execution and monitoring of campaigns.
- Plan in-house and external training assignments in consultation with the Director of Sales & Service

Travel:

- Average: 50%. Must be willing and able to travel throughout the assigned territory, as well as other regions (including the US), sometimes in short-notice and/or for extended periods of time as needed.

Your Profile:

- Technical Bachelor's degree (B.A.) from a three-year university, or relevant experience/training, or an equivalent combination of several years
- Valid and current FAA A&P License or local equivalent as a plus.
- Private Pilot License or higher, CFI, CFII ratings are a plus
- Full professional proficiency in English (verbal and written); additional regional languages preferred.
- Continental factory diesel training
- Previous experience with FADEC diesel engine technology.

What we offer:

- A dynamic role in a global aviation company with attractive benefits
- Opportunities to shape the future of general aviation
- International collaboration and exciting customer projects
- Professional development and training opportunities
- A supportive team and flexible working environment
